# BuildCredit Rent

*Rent reporting made easy. On average, renters could see a 46 point increase in their credit score when reporting rent payments.<sup>1</sup>*

*Offer credit monitoring features that alert users to changes in their credit report, helping them stay informed and proactive about their credit health.*

## Positive only rent reporting

BuildCredit Rent reports only positive, on-time payments helping your customers build credit without the risk of negative impacts.

## 24 month lookahead for rental history

Report up to 24 months of rental history, giving your customers a more comprehensive credit profile.

## Full service dispute management

Array handles all disputes and inquiries from your customers.

## Client sourced and consumer sourced data support

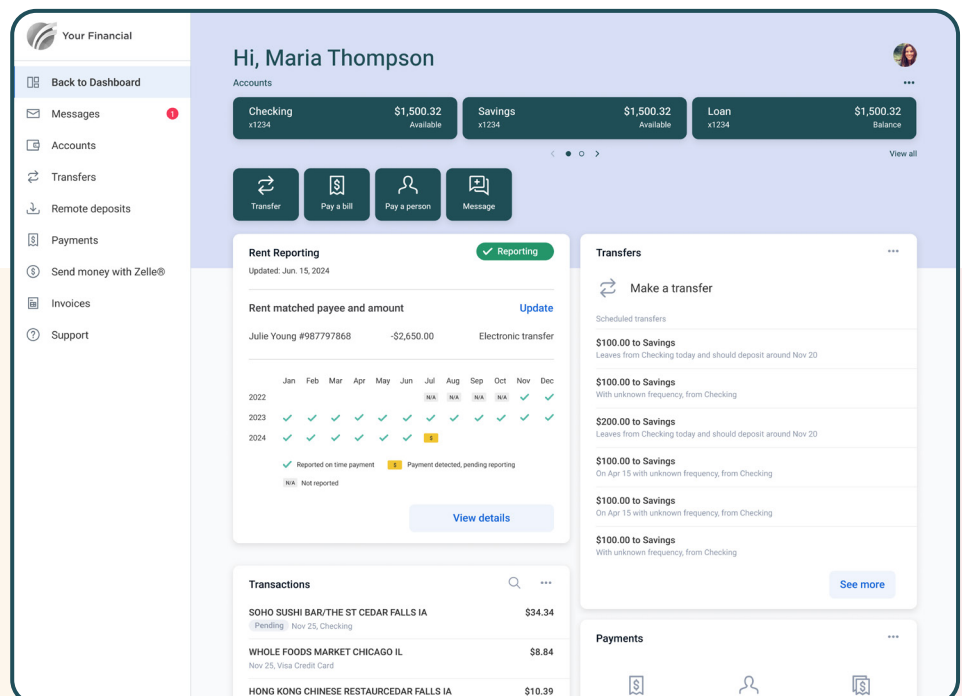

Array accepts both client-sourced transaction data via API and consumer-sourced transaction data, providing flexibility and convenience.

## Accelerated bureau credentialing

Array can credential your business to report rental payments in approximately two weeks,<sup>2</sup> made possible by our long-established credit bureau relationships.

## Private labeled front-end component

The BuildCredit Rent component can be fully private-labeled to match your brand, ensuring a seamless experience for your customers.
